

July 20, 2025

Chief of the General Staff Eyal Zamir
Israel Defense Forces

Major General Ghassan Alian
Head, Coordinator of Government Activities in the Territories

Dear All,

In recent days, reports have emerged claiming that the State of Israel is preventing the entry of humanitarian and medical supplies into Gaza, claiming that such supplies could also be used to produce weapons or terrorist infrastructure.

We fully acknowledge the security considerations involved in any such decision. However, as an organization entrusted with upholding, among other things, the principles of medical ethics and public health, we wish to emphasize the necessity of ensuring the delivery of medical supplies and basic humanitarian conditions for the civilian population in Gaza. This obligation stems both from medical ethics and morality, as well as from international humanitarian law.

We would appreciate your response and your assurance that these supplies are indeed being delivered to those in need in Gaza, while making every effort to prevent them from falling into the hands of terrorist organizations.

Sincerely,

Prof. Zion Hagay
President, Israeli Medical Association
